

Endless Discoveries

PARENT NEWSLETTER

GLEN ROSE

MAY 2020

Finding joy in the seemingly mundane is the way that our children and students learn best. Every walk that your family takes is an opportunity to explore the outside world. Observe the weather, talk about the animals/insects, discover new plants, explore different rock features.

Rules of Exploring the Everyday World, Close Up:

- Leave your electronics at home
- Be open to the wonder that is in your normal routines
- Walk at different times of day or night for the possibility of seeing something new
- Model using your senses by saying things like "I see small flowers," "The tree feels rough,"

"Listen to the birds chirp."

- Bring a magnifying glass (if you have one handy).
- Bring a paper and colors to "document" what you saw.

By taking the extra time to explore our "normal," we open up a new world for our children and students. One that is filled with discovery and excitement!

Student Spotlight: Alana A.

Alana A. is in our Pre-Kindergarten class here at Endless Discoveries - Glen Rose. Alana exudes positivity and kindness towards all of her friends here at EDCDC. She will go out of her way to help her teachers and friends when they are in need.

We love having Alana A. be a part of our school family!
