OCTOBER 2025

Pumpkin Play & Learn

For an at-home activity this month, bring a little fall fun into your home with a pumpkin.

Have your child scoop out the seeds to build hand strength and coordination, then count and sort them for early math practice. Talk about how the pumpkin feels, smells, and looks to expand vocabulary and encourage sensory exploration.

Instead of carving, let your child decorate with paint, stick-

ers, or markers to create their own masterpiece. You can even roast the seeds for a tasty snack, letting your child help with rinsing and seasoning.

Seasonal activities like this make learning playful and meaningful. By turning an ordinary pumpkin into a hands-on experience, children strengthen motor skills, build math and language concepts, and develop creativity, all while making fun fall memories with you.
